

You guys need to back off of XM. The instant weather they provide is more detailed than most LOCAL RADIO stations. And for people travelling through a major metropolitan area who do not know what all the local stations are, it is just a whole lot easier to tune to XM Radio to get the information. Also the weather and traffic may be locally pertinent but I could be in Seattle and I can listen to the traffic and weather for Atlanta. Has anyone considered banning THE WEATHER CHANNEL from giving out it AIRPORT delays AROUND the country. I know they do LOCAL weather only in a certain locale, but I don't think they would like it if someone told them to stop telling people in New York City that Atlanta has delays. Why doesn't the beurocracy just give it a rest. Don't you people have better things to spend tax dollars for.....like cleaning up the airways and TV screens from the filthy words, etc., this would be a much better use of the money and the time. Try banning Howard Stern. (Radio and TV)
